

GSEA

Pathway

Natural killer cell mediated cytotoxicity

Coronavirus disease–COVID–19

Herpes simplex virus 1 infection

Systemic lupus erythematosus

NOD–like receptor signaling pathway

Influenza A

Neutrophil extracellular trap formation

Viral protein interaction with cytokine and cytokine receptor

Toll–like receptor signaling pathway

Cytosolic DNA–sensing pathway

Antigen processing and presentation

Rheumatoid arthritis

Complement and coagulation cascades

Pertussis

Graft–versus–host disease
